File: No_Canon_PIXMA™ MP500 All-in-One...
Product: Canon PIXMA™ MP500 All-in-One...
Brand: Canon
Source: http://www.epinions.com/review/Canon_Pixma_MP500_Printer/content_311468330628

I have owned this printer for 4 months. The **ONLY Problem** has been obtaining ink cart. that will run. Each ink cart. has a chip that insures you must purchase an OEM item at **high prices**. I purchased what appeared to be the exact, OEM cart at Staples, they would not run, the printer rejected the cartridges. Then I tried to refill—a **real disaster**—big mess, ink liaks out, resevoir sensors do not work. This printer gives **excellent** quality **color**, but **Canon** has created a major, high cost trap with the ink cartridge chip/sensor system that requires buying OEM Cart. at **high prices**. Also, I do not get a lot of copies per cartridge.

I would **recommend** not **buying** or getting this printer
